## Affiliate Marketing & Subscription Reward Guide

### The GINIPIK signal subscription, explained for affiliates

Let people try the engine free for 30 days, then build a recurring reward stream from genuine paid renewals - with full disclosure and zero profit promises.

MONITORING

— 01 / WHAT IS INSIDE

# Everything you need to promote PUQET honestly

## The product

What GINIPIK does, how it is delivered and why people pay for it.

## Signal anatomy

How to read and explain a signal without over-promising.

## Reward math

\$0 trial, \$5 renewal, \$1 + \$1, the pool and the profit split.

## Growth playbook

Six steps, a 30-day launch plan and the channels that convert.

## Content kit

Ready-to-send messages, objection answers and the compliance rules.

— THE ONE RULE THAT RUNS THROUGH EVERY SLIDE

**Explain the product accurately, name the price, disclose your reward - and never promise a profit.**

— 02 / THE PRODUCT YOU ARE PROMOTING

## A signal engine you stay in control of

GINIPIK reads live public Binance market data, runs transparent rule-based analysis and pushes the result to the PUQET feed, inbox and Telegram. A notification never places a trade by itself - auto trading is a mode the user switches on deliberately, and it never needs withdrawal permission.

**18**

TRACKED PAIRS

Major assets monitored around the clock.

**5**

AUTOMATED SERVICES

Signals, digest, alerts, delivery, outlook.

**0**

WITHDRAWAL ACCESS

Never asks for seed phrases or withdrawal rights.

**\$5**

FLAT MONTHLY FEE

No commissions, no hidden charges.

— 02 / THE PRODUCT YOU ARE PROMOTING

# How the engine works

## Live market data

Public Binance prices,  
volume, order book.

## Analysis engine

EMA 9/21, RSI 14,  
MACD, ATR, ADX.

## Score + levels

Grade, 0-100 score,  
entry, target, stop.

## Delivered to you

Feed, email and linked  
Telegram.

## You decide

The user acts on it -  
or does not.

— WHY THIS MATTERS IN YOUR PITCH

Every step is rule-based and repeatable - the same inputs always produce the same output. That is why a signal can carry its reasoning, a grade and reference levels instead of a bare BUY label, and why the user can judge it for themselves before acting.

## — 03 / THE PITCH

# Why people pay \$5 a month

## — WHY PEOPLE SUBSCRIBE

 **Get your time back**

No sitting in front of charts all day - the scanner keeps running.

 **Consistent, unemotional logic**

Same rules every run - no panic and no FOMO behind the output.

 **Nothing gets missed**

Feed, inbox and Telegram - wherever the user actually is.

 **Reasoning, not a black box**

Every signal ships with its levels and its logic explained.

## — LATEST ADDITIONS

 **Signal track record**

Every BUY/SELL is checked against its target and stop - the win-rate history is public before anyone subscribes.

 **Personal trade journal**

Users log trades made on their own wallet or exchange and follow live profit and loss.

 **Per-symbol alerts + chart links**

Pick exactly which coins to be notified about; Telegram links open that coin's live chart.

— 03 / THE PITCH

# What you are not selling

## Not a managed fund

You never hold, invest or manage anyone else's money.

## Not an investment product

There is no deposit, no yield and no capital promise involved.

## Not financial advice

Technical-analysis output is information, never a recommendation.

## Not a guaranteed win rate

Targets may not be reached and losses are always possible.

## Not a promise of income

Rewards come only from genuine, tracked, paid renewals.

You are selling a **\$5 monthly service** that saves people hours of chart watching - and nothing more than that.

## — 04 / SECURITY POSTURE

# The easiest part of your pitch

Nobody has to hand over anything dangerous to try GINIPIK. That is the single strongest trust argument you have - lead with it.

## No withdrawal access

Never asks for seed phrases or withdrawal rights. Funds always stay with the user.

## Public market data

Analysis runs on public Binance data - no personal account data is needed for it.

## Secure session login

Accounts are verified server-side on every request via a secure, HttpOnly session cookie.

## Full history visible

Every signal and every subscription payment stays in the account history.

## — SAY IT LIKE THIS

"It never asks for your seed phrase and never gets withdrawal permission. Worst case, you paid \$5 and did not like the notifications."

— 05 / WHAT ONE SUBSCRIPTION UNLOCKS

## Five automated services, one flat \$5

### SERVICE 1

#### Trading signals

EMA 9/21 confirmed by RSI 14 across all 18 coins, every few hours, from live Binance data.

Grade A+ to F

Entry / target / stop

Public track record

### SERVICE 2

#### Daily market digest

24-hour change, high/low range and trading volume for every coin on the watchlist.

Daily

24h change

Volume

### SERVICE 3

#### Volatility alerts

Checks every coin about every 20 minutes for a 3% move inside a 30-minute window.

~20 min checks

3% / 30 min

## — 05 / WHAT ONE SUBSCRIPTION UNLOCKS

# Delivery and the weekly view

**SERVICE 4**

## Multi-channel delivery

Every notification lands in one organised feed with an unread badge and, when enabled, in the inbox and a linked Telegram chat - plus a renewal reminder before access lapses.

PUQET feed

Email on/off

Telegram

Renewal reminder

**SERVICE 5**

## Weekly outlook + journal

A weekly trend read - direction, expected range and RSI - for every tracked token, plus a journal for trades the user placed on their own wallet or exchange.

Weekly refresh

Pushed to Telegram

Live P/L journal

## — ONE SUBSCRIPTION COVERS ALL FIVE

The user picks which symbols they hear about, which channels they receive and whether the weekly outlook is pushed to Telegram. Nothing is posted manually - real market data in, a notification out.

# Transparent reasoning, not a BUY label

BUY SIGNAL ILLUSTRATIVE

PAIR / USDT **Grade A**

ENTRY TARGET STOP  
**Market-based** **Scenario** **Risk control**

Graded **A+ through F** from a transparent 0-100 score. A low-scoring setup is filtered out and never posted.

**A score is not a win probability.**

SIGNAL BREAKDOWN - WHAT IS SCORED

|                                             |                                              |                                           |
|---------------------------------------------|----------------------------------------------|-------------------------------------------|
| <b>Trend</b><br>EMA structure               | <b>Momentum</b><br>RSI and MACD              | <b>Volume</b><br>Participation            |
| <b>Volatility</b><br>ATR range context      | <b>BTC regime</b><br>Does Bitcoin agree?     | <b>Order flow</b><br>Buy vs sell pressure |
| <b>ADX</b><br>Trend strength                | <b>Support / resistance</b><br>Nearby levels | <b>Risk / reward</b><br>Target vs stop    |
| <b>Entry quality</b><br>Timing of the setup |                                              |                                           |

## — 07 / READING THE GRADE HONESTLY

# What the score does and does not mean

## A+ / A

Strongest alignment of factors - still not a guarantee that the target is reached.

## B

Solid setup with one or two weaker components inside the breakdown.

## C

Mixed picture - the reasoning section is exactly where that caution shows up.

## D / F

Too weak to publish - filtered out by the quality gate and never posted.

## — IMPORTANT RISK NOTICE - ALWAYS INCLUDE THIS WHEN YOU PROMOTE

## A signal score is not a win probability.

Technical-analysis output is informational only. Crypto markets are volatile; targets may not be reached and losses are possible. GINIPIK does not provide financial advice, and no profit is guaranteed or paid out as part of the subscription.

If a prospect asks "how much will I make?", the correct answer is: **nobody can tell you that** - it is a monitoring and analysis tool, not an income product.

— 08 / COVERAGE AND DELIVERY

# 18 pairs in. Three channels out.

## — THE WATCHLIST - 18 TRACKED PAIRS

|           |           |           |           |           |
|-----------|-----------|-----------|-----------|-----------|
| BTC/USDT  | ETH/USDT  | BNB/USDT  | POL/USDT  | SOL/USDT  |
| XRP/USDT  | ADA/USDT  | DOGE/USDT | LINK/USDT | AVAX/USDT |
| LTC/USDT  | TRX/USDT  | SUI/USDT  | AAVE/USDT | UNI/USDT  |
| NEAR/USDT | ONDO/USDT | PEPE/USDT |           |           |

Only the highest-scoring qualified setup is posted on each run - no random picks, no flooding the feed.

— 08 / COVERAGE AND DELIVERY

## Three channels, nothing missed

### PUQET feed

One organised feed with an unread badge, so nothing is lost.

### Email

On or off at any time; renewal reminders arrive before the subscription lapses.

### Telegram

Signals, alerts, digest and the weekly outlook arrive automatically, each with a live-chart link.

— 08 / COVERAGE AND DELIVERY

## Control, proof and record-keeping

### Per-symbol notifications

Users choose exactly which coins they want to hear about instead of receiving every signal - fewer, more relevant messages.

### Public signal track record

Every BUY/SELL is checked against its target and stop, and the win-rate history is visible even before subscribing.

### Personal trade journal

Users log trades placed on their own wallet or exchange, add notes and watch live profit and loss. PUQET never holds those trades.

— 09 / THE OFFER

# Simple offer. Transparent reward flow.

A referred user explores GINIPIK for 30 days without a subscription charge. No fee is collected in the trial month, so no Sponsor or Super Sponsor reward is created.

MONTH 1

\$0

FIRST 30 DAYS

Full access to feed, digest, alerts and outlook. No charge, so **no reward is generated.**

MONTH 2 ONWARD

\$5

SUCCESSFUL RENEWAL

A flat monthly fee for 30 more days of access. No trade commission, no hidden charge.

REWARD EVENT

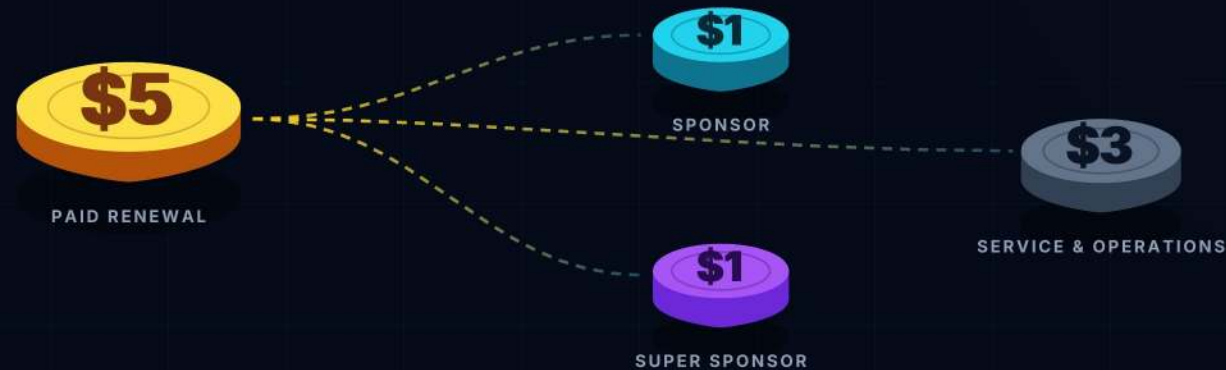

\$1 + \$1

SPONSOR + SUPER SPONSOR

Paid per tracked, eligible renewal, subject to the current program rules and account standing.

— 10 / REWARD FLOW

# How a \$5 renewal is distributed

— WHERE THE REST GOES

The \$3 service and operations share funds the engine, infrastructure, delivery and support that keep the product running. Rewards arise only from genuine, successfully tracked and paid renewals - a free trial month creates no reward at all.

— 10 / REWARD FLOW

# What each side gets

— WORKED EXAMPLE

**1 Month 1 - free trial**

User A explores GINIPIK at no charge. Your reward is **\$0**.

**2 Month 2 - successful \$5 renewal**

You receive **\$1 Sponsor**; your eligible upline receives **\$1 Super Sponsor**.

**3 Month 3 and beyond**

While User A keeps renewing and stays eligible, the reward repeats.

— WHAT THE SUBSCRIBER GETS FOR \$5

- ✓ Signals on 18 coins
- ✓ Volatility alerts
- ✓ Telegram delivery
- ✓ Track record
- ✓ Per-symbol control
- ✓ Daily market digest
- ✓ Weekly outlook
- ✓ Email delivery
- ✓ Trade journal

All payments are final - no refunds. Cancel by not renewing.

— 11 / THE REWARD ENGINE

# Two levels. One dollar each. Recurring.

## — SPONSOR - LEVEL 1

**\$1** per tracked paid renewal

Paid to you, the direct referrer, on every successful \$5 renewal that satisfies the program rules.

## — SUPER SPONSOR - LEVEL 2

**\$1** per eligible renewal

Paid to the eligible upline above the direct sponsor, on the same renewal event.

## — HOW TO CALCULATE

Sponsor reward = successful paid renewals × \$1

Super sponsor = eligible level-2 renewals × \$1

— 11 / THE REWARD ENGINE

# What counts and what does not

## — WHAT COUNTS

- ✓ A genuine user completes a successful **\$5 paid renewal**
- ✓ The referral is correctly tracked to your link (30-day cookie)
- ✓ The account is in good standing under current program rules

## — WHAT DOES NOT COUNT

- ✗ A free trial month - no fee collected, no reward created
- ✗ A signup alone, with no paid renewal behind it
- ✗ Self-referrals, duplicate identities or spam traffic

12 / SCENARIOS, NOT PROMISES

# Recurring reward scenarios

| DIRECT RENEWALS | SPONSOR | LEVEL-2 | TOTAL |
|-----------------|---------|---------|-------|
| 10              | \$10    | \$5     | \$15  |
| 25              | \$25    | \$15    | \$40  |
| 50              | \$50    | \$30    | \$80  |
| 100             | \$100   | \$60    | \$160 |

Gross figures if every listed user completes one successful paid renewal in the same 30-day period - arithmetic examples of the reward rate, not income projections.

— 13 / SCENARIOS, NOT PROMISES

# The three numbers that actually matter

## — TRIAL-TO-RENEWAL RATE

Of the people who start the free month, how many pay for month two? That depends on whether they understood the product - which is your job at signup.

## — RETENTION

Rewards repeat only while users keep renewing. One well-supported user who stays a year is worth more than ten who never return.

## — REFERRAL QUALITY

Genuine people with real interest in crypto markets. Volume without intent produces trials that never convert and can put your account at risk.

— 13 / BOT SUBSCRIPTION AND POOL MEMBERSHIP

# First month free. Then \$5 a month.

Every new user starts with a free bot month - no service charge, no code required. From the second month the bot is a flat \$5, and **\$1 of every bot, every month, goes into the Gini Pick Pool.**

— HOW TO BECOME A POOL MEMBER

## Join PUQET

Create your account

## 5 Sponsors

Five direct sponsors

## 1 Star

Reach your first star

## 5 x 1 Star

Five stars in your team

## Pool Member

Gini Pick Pool access

— 13 / BOT SUBSCRIPTION AND POOL MEMBERSHIP

## Bot purchase and the Gini Pick Pool

Bot purchase

**\$5 / month**

after the first month free

**\$1**

to Gini Pick Pool  
per bot, per month

Pool membership is earned through the five steps, not bought. Pool amounts depend on how many active bots are running, so never quote a fixed pool payout - it varies every month and is never guaranteed.

— 14 / PROFIT DISTRIBUTION

## Every trade creates value – shared fairly

**50%**

To you

Your share from trading profit.

**30%**

Referral level

Distributed through our referral system.

**10%**

Maintenance cost

Auto bot service, maintenance and other service charges.

**5%**

Risk fund

Company's risk fund for stability and security.

**5%**

Company profit

For the growth and sustainability of PUQET.

Every percentage applies to **profit that is actually generated**. No profit in a period means nothing to distribute – and trading losses remain possible. Quote the split, never a figure.

— 15 / PROFIT DISTRIBUTION

## What the bot actually does

### Trading signals

Real-time market analysis and signals across the watchlist.

### Auto trading

Executes trades automatically once the user enables it - and it can be switched off at any time.

### 24/7 operation

Runs around the clock so an opportunity is never missed while the user is away.

— 16 / REFERRAL DISTRIBUTION

## 30 levels – earn more with every level

 **Level 01** Your direct referrals **20%**

 **Level 02** Second line **10%**

 **Level 03 - 10** Eight levels at five percent **5%**

 **Level 11 - 15** Five levels at three percent **3%**

 **Level 16 - 30** Fifteen levels at one percent **1%**

# 30

LEVELS DEEP

Deeper network, bigger earnings - the referral share is spread across all thirty levels, and eligibility follows the current PUQET terms.

## Six steps that actually produce renewals

**01**

### Join

Create a PUQET account and complete any verification.

**02**

### Copy

Get your affiliate link or referral code from the dashboard.

**03**

### Educate

Explain the product, the free month, the \$5 price and the risk.

**04**

### Share

Use communities you belong to, tutorials and honest outreach.

**05**

### Support

Help users link Telegram and read a signal in week one.

**06**

### Track

Review renewals in your dashboard and repeat what converts.

# Your first 30 days, week by week

| WINDOW     | FOCUS                  | WHAT YOU ACTUALLY DO                                                                               |
|------------|------------------------|----------------------------------------------------------------------------------------------------|
| Days 1-3   | Learn the product      | Use GINIPIK yourself on the free month. Link Telegram, pick symbols, read five signals end to end. |
| Days 4-10  | Build your explanation | Write your own 60-second version including the free month, the \$5 price and the risk notice.      |
| Days 11-20 | Share where you belong | Post the walkthrough, answer questions publicly, invite people who already follow crypto markets.  |
| Days 21-30 | Support the trials     | Check in before day 25 - this is exactly where renewals are won or lost.                           |
| Ongoing    | Review and repeat      | Read your dashboard monthly: which channel produced renewals, not just signups.                    |

# The message you send

## — MAIN SHARE MESSAGE - COPY, PASTE, REPLACE THE LINK

Try **GINIPIK**, PUQET's automated signal engine, free for your first month.

Automated crypto signals across 18 pairs, a daily market digest, volatility alerts and a weekly outlook - delivered to your PUQET feed, inbox and Telegram. Every signal comes with its reasoning, a grade and reference entry, target and stop levels.

A signal never places an order by itself - you decide. Auto trading is an option you switch on yourself, and no withdrawal permission is ever required. After the free month it is a flat **\$5/month**.

No profit is promised or guaranteed; crypto trading carries real risk of loss.

Join through my link: **[PASTE YOUR AFFILIATE LINK]**

Disclosure: I may receive an affiliate reward if you subscribe.

— 20 / CONTENT KIT

## Short captions and one-to-one outreach

### — SHORT SOCIAL CAPTIONS

**A.** I stopped refreshing charts every hour. GINIPIK scans 18 pairs and sends me the setup, the score and the levels - in Telegram. First month free, then \$5. Not financial advice.

**B.** Signals that explain themselves: trend, momentum, volume, volatility and a 0-100 score on every alert. You decide every trade. Free for 30 days.

**C.** A daily digest, instant 3% move alerts and a weekly outlook for \$5/month. Affiliate link below - I may earn a reward.

### — ONE-TO-ONE MESSAGE (OPTED-IN PEOPLE ONLY)

Hey [name] - you mentioned you were trying to keep up with the market manually. PUQET's GINIPIK watches 18 pairs and pushes signals, a digest and volatility alerts to Telegram, with the reasoning attached to each one.

First 30 days are free, then \$5/month. Happy to walk you through how to read a signal if you want to try it.

Full disclosure: I may receive an affiliate reward if you subscribe. No returns are promised - the market risk is still yours.

# What to say when they push back

## IF THEY SAY

## YOU ANSWER

"Does it trade without me?"

Only if you turn auto trading on yourself. Notifications alone never place an order, and no seed phrase or withdrawal permission is ever requested.

"How much will I make?"

Nobody can tell you that, and be sceptical of anyone who does. It is an analysis and monitoring tool, not an income product. Losses are possible.

"Why should I pay for signals?"

You are paying for consistent monitoring of 18 pairs and delivery to where you already are - plus a public track record you can check before you subscribe.

"I already get too many alerts."

Choose your symbols. Per-symbol notifications mean you only hear about the coins you actually care about.

"What if I want to stop?"

Simply do not renew - access ends when the current 30 days are up. Note that payments made are final.

— 22 / COMPLIANCE

# Build trust. Market responsibly.

— DO

✓ **Disclose**

Say plainly that you may receive an affiliate reward.

✓ **Be accurate**

Use current product, price and reward information only.

✓ **Focus on value**

Show how the alerts and delivery save monitoring time.

✓ **Explain the risk**

Say clearly that losses are possible and nothing is guaranteed.

— DO NOT

✗ **No profit promises**

Never guarantee returns, win rates or fixed income.

✗ **No spam or bots**

No mass unsolicited messages or automated distribution.

✗ **No fake accounts**

No self-referrals, duplicate identities or deceptive profiles.

✗ **No sensitive access**

Never request API keys, seed phrases or withdrawal permissions.

# Your responsibilities as an affiliate

## Act in good faith

Attract genuine new users  
- never existing PUQET  
users, contractors or  
service providers.

## Keep it accurate

Any website, group or  
newsletter you promote  
through stays current and  
correct.

## Stay within the law

Comply with all applicable  
laws and anti-spam rules in  
every market you promote  
in.

## Be truthful

Every promotional  
statement truthful,  
professional and legal - no  
exceptions.

Your referral code is **licensed to you, not owned by you**. PUQET may deactivate or invalidate it at any time, and rewards remain subject to review for fraud.

— 23 / QUESTIONS YOU WILL BE ASKED

## Short, honest answers

### Is this financial advice?

No. Technical-analysis output for information only - not a recommendation, and no profit is guaranteed.

### Does GINIPIK trade for the user?

Only when the user switches auto trading on. A signal by itself never places an order.

### Does it need exchange access?

Analysis uses public market data. Auto trading needs a connection the user sets up - never a seed phrase.

### Is it real AI?

No black box. Transparent, rule-based technical analysis, so every signal carries its reasoning.

### Can a user cancel anytime?

Yes - a flat monthly fee. Not renewing ends access after the current 30 days. Payments made are final.

### Do I earn on the free month?

No. No fee is collected during the trial month, so no Sponsor or Super Sponsor reward is created.

— 24 / START HERE

# One product. One price. One honest explanation.

## — PRE-LAUNCH CHECKLIST

- ✓ I have used GINIPIK myself for at least a week
- ✓ I always state that losses are possible and nothing is guaranteed
- ✓ I never ask anyone for seed phrases or passwords
- ✓ I can explain the free month and the \$5 renewal in one sentence
- ✓ I disclose that I may receive an affiliate reward
- ✓ I only share my link with people who opted in to hear from me

## — THE PRODUCT

[puqet.com/ginipik](https://puqet.com/ginipik)

## — THE OFFER

30 days free, then \$5

## — THE REWARD

\$1 Sponsor + \$1 Super Sponsor

## — DISCLAIMER

Marketing material only.  
Not financial advice.
